Checkpoint 4 Dirk - Portfolio evidence (WK5)   19-03-2025   ☺

Barrios Peña, Fabiana F. 4 hours ago

I shoed dirk my current structure on how im linking the evidence for the LOs on my portfolio and he suggested it may be more clear if i write a short context sentence and give the evidence with some text connecting it with the specific LO, instead of having a whole page evidence-based text and just link the same page on several LOs as teachers would have to scroll to find the specific info.

Checkpoint 3 feedback on 1st portfolio review 17-03-2025

Barrios Peña, Fabiana F. 2 days ago

Penny and josh werent able to access some evidence links in the reading guide even though i made sure to give them access permisions in one drive. I need to make sure before hand they are able to open them. I created a github where all links work and posted them on Hera. Josh suggested to have an actual answer as to why im using github and not gitlab. For the feedpulses, everything would be more organized if each change and product had its corresponding feedpulse together with a small text with context. Overall both said im on the right track and if i take into consideration their feedback, as well as getting more perspectives from other teachers, keep everything organized and up to date it will go well. Also, for lo5 anything can be included as long as its explained and related to it correctly (even if its not directly from fontys or its not obvious it has anything to do with ict)

Checkpoint 2 Portfolio Feedback Josh 24-02-2025

Barrios Peña, Fabiana F. 23 days ago

I showed Josh my portfolio but i mainly just wanted to clear some doubts about it rather than my design. I asked mainly about the structure of it and he suggested i use the double diamond faces to avoid doom scrolling through information, even though each text has its own little title, its an eternal scroll. Also i wanted to avoid so many clicks between the project section, and the different phases of the project. For the reading guide, no extra information is there (context) its is just like a tool to help teacher navigate through my portfolio and make comments about any updated information.

Checkpoint 1 Feedback Jan 13-02-2025

Barrios Peña, Fabiana F. a month ago

I showed my initial steps to creating my portfolio, low fidelity and hi-fi prototype to test out the user flow and the documentation structure. For the prototype is best to user test it now and then continue adding details onto the hi-fi just to prevent having to change too many things. Documentation was on track and Jan suggested for the structure, as i asked if there were too many subheadings, to kind of include the double diamond method to structure it, and it could also be helpful as it is very related to LO4.
